Heavy Duty

- Range of industrial tools manufactured in Germany
- Made from special tool shed steel oil hardened and tempered
- Handles are pvc coated with anti slip guards were appropriate
- Ideal in heavy duty applications

TEE264X

Side Cutters

Blade length = 22  
Overall length = 200  
Blade angle = 15°

Cutting capacity:  
Copper = 5.0mm  
Aluminium = 5.0mm  
Medium hard wire = 4.2mm  
Hard wire = 3.0mm  
Piano wire = 2.5mm

These cutters are specifically designed for heavy duty hard wire cutting, the handles are long with the pivot very close to the cutting edge, the pivot is a forged on articulated axle for exceptional strength and durability, the cutting edges are induction hardened to 64HRC, and the handles have a thick PVC insulation for comfort and safety.

Bahco Standard 'Ergo' Series

- High quality heavy duty cutters and pliers for production use
- Hard polypropylene handles with high grip thermoplastic elastomer insert, giving a comfortable grasp
- All blades are shaped and hardened to cut hard steel or piano wire
- Certain models have return spring with on off function
- High accuracy joint giving play free operation

TEE275X

Side Cutters

- New progressive edges enable the cutting of both soft and very hard wire
- Return spring function, either on or off
- Greater leverage than normal cutters
- Slip resistant grip

The Progressive edges work by having very sharp cutting edge at the tip of the blade giving excellent cutting of soft wires. i.e. copper cable, three core cables and plastics. The further down the cutting blade you cut the more rounded the edges become offering greater cutting capacity of very hard materials. i.e. steel wire and piano wire.

Overall Length	Cutting Capacity at the tip	Cutting Capacity at the joint	Mfrs. List No.	Order Code
133	2.0mm copper	1.6mm piano	2101G-125	310-5489
150	2.5mm copper	1.8mm piano	2101G-140	310-5490
168	3.0mm copper	2.0mm piano	2101G-160	723-8423
