Impact Driver 14.4V

GDR144V Bosch 14.4V cordless impact driver is ideal for repetitive screw driving in or areas where access is restricted. The percussion action on the Bosch GDR 14.4V will save you time and effort. The mechanism operates in the same way as a conventional percussion (hammer) drill and therefore drives the screw into the material as well as rotating it. The Bosch GDR 14.4V benefits from a strong cammed brush DC-motor with optimum ventilation and a sturdy aluminum gear box with rubber protection ring. The GDR 14.4V comes complete with M16 battery which have no memory effect therefore can be "topped up" or charged at any time without affecting battery life. M16 Batteries also tend to out-perform NiCd batteries in high drain applications. Belt clip, hand strap, rubber ring.
